

FIRST "TWILIGHT TWINS" IN WEST AND THEY'RE SOME TWINS

"Twilight Sleep" twins posing for first photograph. Elinore Helen at left; Mortimer Minden sleeps peacefully at right.

Kansas City, Mo., Aug. 3.—You can't show the Shannon twins of Missouri anything about keeping right up to the band wagon of science. The twins arrived two weeks ago at the home of Mr. and Mrs. J. R. Shannon, and they came by the very newest and most scientific route—the "twilight sleep" route.

Both babies are of normal size. Mortimer Minden is a hefty youngster, with some hair on his head; Elinore Helen has less weight, curlier hair and the same sweet disposition her brother has.

It was Mrs. Shannon's first venture into "twilight" land. The treatment was administered at her home and it was very successful.

MOTHERHOOD NEED NO LONGER LEAD WOMAN INTO DREAD "VALLEY OF DEATH"

In Mrs. Boyd's first article on "Twilight Sleep," she discussed the meaning of "Twilight Sleep." Today she tells you what "Twilight Sleep" means to the mother; in her final article she will consider what painless birth means to the child.—Editor.

BY MARY BOYD

President of the Twilight Sleep Association of New York.

"It seems to me," said a woman

doctor, an enthusiast for twilight sleep, "that the best thing about twilight is that it makes the doctor and nurse fuss over the mother and give her sympathy and care all through her labor."

This doctor was herself the mother of two children, born after a normal labor without twilight sleep which lasted two whole days. She remembers with special resentment how she was left, like a sick cat, as she ex-
